

Cushina Wind Farm

SAMPLE MET MAST

Cushina Wind Ltd.

As communicated recently, a temporary 80 meter met mast has been installed on the site to collect wind speed, direction, temperature, humidity and air pressure.

An application has recently been submitted for the retention permission for the existing 80 meter meteorological mast.

If you have any question on this metmast application or indeed any queries at this point, please contact our dedicated Community Liaison Officer:
